WORK EXPERIENCE

GRANT THORNTON Feb 2026 – Present
Service Desk Analyst *Tampa, FL (Remote)*

- Independently mapped an undocumented service desk role into a full operating playbook before my first day: triage logic, knowledge base routing, escalation paths, and required call details
- Built an AI call-guidance assistant on the playbook that gives real-time prompts on what to ask and capture; used on live support calls
- Triage, document, and escalate Tier 1/2 requests in ServiceNow and Jira for healthcare and managed IT clients, supporting SLA compliance and first-contact resolution
- Support healthcare point-of-care device deployment and lifecycle and manage account access (Active Directory, Duo)

THE UNIVERSITY OF TAMPA May 2024 – May 2026
Student Supervisor Intern, ITS Service Desk *Tampa, FL*

- Built a performance-evaluation model from team ticket data on my own initiative, using z-scores and shift-load adjustment so scores reflected the person, not the schedule; presented findings to management, who adopted it as the standing method
- Supervised 25 student technicians supporting 15,000+ users, coordinating coverage to resolve 200+ weekly tickets
- Standardized response templates and escalation protocols, improving resolution time; designed and delivered onboarding bootcamps for new hires

THE UNIVERSITY OF TAMPA Jan 2025 – Aug 2025
Undergraduate Research Fellow, SURF (Machine Learning & OCR) *Tampa, FL*

- Engineered CNN and MLP models in PyTorch for handwriting recognition on archival documents (93% OCR accuracy)
- Built the full pipeline end to end: preprocessing, cropping, normalization, data augmentation, training, and deployment
- Deployed a customer-facing React archive (MongoDB, AWS S3) where users search and retrieve recognized documents

PROJECTS

GLIDE+ (AI Task Manager) May 2025 – May 2026
Product Lead *Tampa, FL*

- Led a 4-person cross-functional team to build and launch an AI productivity app for students with ADHD and overwhelm, now live with 25+ real users
- Surveyed 35+ students and turned the results into the core feature set: AI task prioritization (75% wanted it) and Canvas sync (65%); made the dashboard the default landing page and kept Canvas and personal goal tasks separate
- Applied GPT-4o-mini to prioritize tasks from each student's academic context and rebuild the daily schedule; shipped on React/Vite, Node.js/Express, and Firestore with Canvas LMS integration
- Validated launch readiness with unscripted beta tests with real users, Playwright smoke tests, and a pen test by UTampa's Ethical Hacking Club (no issues found); presented the product with a live demo

CATALYST (SLA Bottleneck Analysis for UTampa ITS) Jan 2025 – May 2025
Product Lead *Tampa, FL*

- Redefined delay criteria across 11,500+ UTampa ITS support tickets to surface the ~5% of cases that were actually actionable, rather than modeling the noise
- Engineered early-stage workflow features (routing switches, response delays, weekend creation) and trained a calibrated Random Forest model achieving 60%+ recall on rare SLA-risk tickets before resolution
- Used model interpretability analysis to isolate early team switching and slow first response as the top drivers of SLA violations

EDUCATION

THE UNIVERSITY OF TAMPA (UTAMPA)
B.S. Candidate in Computer Science, Minor in Business Administration *Tampa, FL*
Relevant Coursework: AI/ML, Algorithms & Data Structures, Software Design & Engineering, UI/UX, Applied Statistics

SKILLS

- **Product:** User research, usability testing, data analysis, Agile, Figma
- **Technical:** Python, SQL, JavaScript/TypeScript, React, Node.js, Java, Git
- **Data & AI/ML:** pandas, scikit-learn, PyTorch, OpenAI API, statistics
- **Languages:** English, Tigrinya (native), French (conversational), Spanish (conversational)

LEADERSHIP

President, African Students Association, UTampa Jan 2024 – May 2026

- Grew a 50+ member organization by 40%, securing funding through university proposals and fundraisers and leading outreach events and cross-organization collaborations

Program Coordinator, Girls Who Code, UTampa Aug 2025 – May 2026

- Directed 25+ workshops for women in tech, growing participation 30% through mentorship and outreach, and organized industry events focused on career readiness
